

COSMOTEX we are specialists in spreading, ironing, screen printing and washing machines for textile industry.

Model

COSMOTEX washing SP

QR CODE

SP COSMOTEX models, ensure the best quality finishing of your garments at lowest process cost and lowest maintenance.

The Cosmotex dyeing machines are equipped with microprocessor Telemecanique, and digital colour touch screen control panel. Cosmotex software works to optimise the machine's functions and permits all operations controlling as automatic control of the bath, time of cycle, temperature, inversion time, rotation speed and enables the programming of larger number of automatic recipes. Ethernet network connections are possible to control from main computer in the office.

The constructive shape and technical features of COSMOTEX washing machines permits to have important direct saves in water consumption. Adapted to carry out any type of wash (stone-wash, bleach, and so on), and variety of garment finishing. Stain less steal strongest Basket structure with special beaters to guarantee uniform results every time with high powerful beaters to resist long stone-wash processes.

because quality matters
